

Politechnika Gdańska

WYDZIAŁ ELEKTRONIKI
TELEKOMUNIKACJI I INFORMATYKI

Katedra Inżynierii Oprogramowania
zaprasza na
seminarium

**Medical Device Virtual Integration for
Interoperable Medical Devices**

które wygłosi

Brian Larson
NSF/FDA Scholar in Residence
Kansas State University

**Seminarium rozpocznie się
dnia 02.02.2016 o godzinie 14:30 w sali 633 EA**

Opis seminarium

Many people in academia and industry have been pursuing interoperable medical devices in which several devices work together coordinated by a control application. Kansas State University (KSU) has been a leader with their Medical Device Coordination Framework (MDCF)--a network middleware providing publish-subscribe services.

Brian Larson, visiting from KSU, will provide an overview of their work on interoperable medical devices, and his invention of MD-VI, without which medical device interoperation could not achieve regulatory approval.
