**Software is eating the world – Process improvement,
Education and Artificial Intelligence**

które wygłosi

Muhammad Ovais Ahmad

(University of Oulu, Finland,

visiting professor at Gdańsk University of Technology)

**Seminarium rozpocznie się
dnia 9.04.2019 (wtorek) o godzinie 14:15 w sali 633 EA**

Abstract

Software is eating the world as reads a famous quote from Marc Andreessen in a 2011 Wall Street article. This created three strong requests:

1. software organisations needs to catch up fast pace moving market and customers' demands,
2. academic institutes needs to produce the required software engineers,
3. artificial intelligence advancement and ethical dilemma.

This lighting talk with cover these three requests and presents the research collaboration opportunities.
